Question 1

Correct

Marked out of 1.00

Given an ArrayList, the task is to get the first and last element of the ArrayList in Java.

Input: ArrayList = [1, 2, 3, 4]

Output: First = 1, Last = 4

Input: ArrayList = [12, 23, 34, 45, 57, 67, 89]

Output: First = 12, Last = 89

Approach:

1. Get the ArrayList with elements.
2. Get the first element of ArrayList using the get(index) method by passing index = 0.
3. Get the last element of ArrayList using the get(index) method by passing index = size – 1.

Answer: (penalty regime: 0 %)

```

1 import java.util.ArrayList;
2 import java.util.Collections;
3 import java.util.Scanner;
4 public class FirstLast
5 {
6     public static void main(String args[])
7     {
8         Scanner s=new Scanner(System.in);
9         int size=s.nextInt();
10        ArrayList<Integer> number=new ArrayList<>();
11        for(int i=0;i<size;i++)
12        {
13            number.add(s.nextInt());
14        }
15        int fe=number.get(0);
16        int le=number.get(number.size()-1);
17        System.out.println("ArrayList: " + number);
18        System.out.println("First : " + fe + "," + " Last : " + le);
19
20        s.close();
21    }
22 }

The given Java program is based on the ArrayList methods and its usage. The Java program is partially filled. Your task is to fill in the incomplete statements to get the desired output.

```
list.set();  
list.indexOf();  
list.lastIndexOf()  
list.contains()  
list.size();  
list.add();  
list.remove();
```

The above methods are used for the below Java program.
